LIVE COMPLAINT TRIAGE, REVIEW & CONTROLLED FEEDBACK
Citizen submits original text
Next.js + TypeScript
FastAPI validates schema, size and permissions
Write immutable submission / audit metadata
Independent safety / urgency screening
Never suppress emergencies based solely on AI label
Versioned TF-IDF + linear SVM
Three-class provisional prediction
PostgreSQL pending review queue
Complaint text, timestamp, model version
Administrator confirms, corrects or escalates
Decision audit, referral, workflow state
Acknowledged -> In Progress -> Resolved -> Closed
Separate state from Valid/Suspicious/Spam classification
Quality-controlled feedback pool
Dual review if disputed; de-identification
Offline retraining + regression tests
Approval / rollback before new model version
versioned release
