Separate development candidate experiment (N = 2,399)

Pipeline	Macro-F1	Errors	Log loss	ECE (10 bins)
Reference word SVM	1.000000	0	Not calibrated	Not calibrated
Word + character SVM	1.000000	0	Not calibrated	Not calibrated
Calibrated word + character	1.000000	0	0.00079512	0.00079433

One fixed candidate; sigmoid calibration uses three grouped training folds.
All classification scores tie; probability diagnostics are confined to synthetic development data.
Candidate models were not evaluated on the historical test partition.
